Wisdom Breed

Don't be a victim of the errors of your parents. You must be deliberate about your life.

You don't have two lives, diligently invest in this one and make most of it.

One thing that is affecting most of us is that we haven't been able to develop our minds more than that of our parents.

We inherited terrible mindsets yet we are comfortable.

We grew up in environment plagued with mediocrity yet we are cool with it.

You may not like the way your dad treats your mom.

Your heart keeps bleeding each time you see the way your mom has become a fool under your dad.

Listen, you are likely to enter into the same trap as your mom unless you revolutionize your mind.

Generational mindset will keep reproducing generational problems.

You can't rise more than the development of your mind.

You can't do well in life beyond the development of your mind.

No matter how much you desire fulfilling marriage, greatness and fruitful life if your mind is not developed and nurtured you will be very limited.

Most people are very confused about their lives.

They want to make meaning with their lives but they don't know the steps to take and the direction to follow because their minds are unrefined.

I will keep repeating it that just because you're existing doesn't mean you know how to live.

Look at the way young ladies of nowadays fall in love. So terrible...

A lady called me at about 1am this morning, I didn't want to pick but I picked because I have known her to be a serious minded person...

She discussed her relationship situation with me and I counseled her....

What I observed is that the lady knows what she's doing. I could discern that her mind is very developed and upgraded so much that the man she's in a relationship with can't meet up. I was so pleased with the state of her mind.

If you're still a victim of your feelings and emotions is a proof your mind is not developed and unrefined.

Sincerely, I have interacted with different kinds of people and I am still shocked at the way they think.

Sincerely speaking, most of our parents are not helping at all. They were raised in ignorance and mediocrity yet they're raising us in their folly too.

The devil has packaged ignorance, mediocrity and carelessness and call it CIVILIZATION.

Lastly, work on your mind.

Your choices, decisions and interests will be determined by your mind.

You can carry a great potential while your mind may be small.

Look at how young ladies of nowadays mess up things.

Look at how unruly, purposeless and unguided young men of nowadays are.

The folly is boldly written on people's faces.

QUICK TIPS..

1. Develop your mind : Go for knowledge. Contend for transformation through knowledge.

I could remember counseling a person in 2019 and I asked her, who is your role model? And she mentioned her dad... I was shocked.

I told her, look at your dad... What can you see?

She kept quiet... _She got my message immediately._

Invest in knowledge. Seek wisdom. Build your understanding.

Mediocrity is terrible.

2. Invest in knowledge : Bishop Oyedepo said at the age of 10 his children had been reading Christian books. What!

You will see a girl who has never read a book on marriage and relationship yet already building what she calls relationship. Isn't that funny?

Your deliverance from ignorance, mediocrity and foolishness begins with investment in knowledge.

It may take you 10 years of investment in knowledge for just a decision you will make within a year.

3. Submit to mentorship: You need to open your heart to knowledge, wisdom and understanding.

Mentorship is a system of keeping yourself from the mistakes and mediocrity of this age.

I found this funny...

Who taught you how to open your breasts and vagina for boyfriends but you don't know to open your heart to mentorship and discipleship. Welldone!

Who taught you how to choose boyfriends? But you don't know how to choose mentors.

Listen, you must be trained and prepared for life.

Make up your mind that will always get it right in order to get better.

Listen, if your mom had got it right by now she will be getting better. Think!

Pay attention on yourself.

Do for yourself what's required not what's convenient. Selah!

Please take this from me...

Don't be a victim of the ignorance of your parents.

It's impossible to be free from generational curses if you're a victim of generational ignorance.
